--------------	----------	--------------------------------	--	---

Payment Details

Inside an entry, after displaying the entry details, there should be a list or table of payment/s made to that loan. A button should also be available to create a payment.

When a payment is made, the entry should be updated of the remaining amount to be paid.

▼ Payment details should contain the following:

Name	Mandate	Data Type	Stored in DB	Notes
Payment Date	Required	Date (YYMMDD)		Defaults to current date
Payment Amount	Required	Amount (Decimal)		
Payee	Required	Person		If only one person loaned, if defaults to one person If loaned by a group, select the payee
Proof	Optional	BLOB		Photo/s showing the payment (e.g. EWallet screenshot)
Notes	Optional	Alphanumeric		See <i>ADC - Notes</i>

Installment Details

This is an optional view.

This will only appear if the transaction type is an installment

This section should contain the details of the installment, and options of payment

A graphical indicator should be visible to see the percentage of the payment that has been made

Two buttons should be present:

Add Payment

- When pressed, the window or modal for Payment Details should appear

Skip Term

- When pressed, the current term will be skipped and should mark the installment as *Skipped*

Payment Allocation

This is an optional view.

This will only appear if the borrower is a group

This section should contain the payment breakdown per person in an expense.

The following quick-actions should be present:

Divide Equally

- When pressed, the expense is shared among each member in the group

Divide by Percent

- When pressed, the expense is manually entered via percentage per item

Divide by Amount

- When pressed, the expense is manually entered via amount per item

▼ Installment details should contain the following:

Name	Mandate	Data Type	Stored in DB	Notes
Status	Required		NO	See ADC - Notes
Start Date	Required	Date (YYMMDD)	YES	Amount
Payment Frequency	Required	Alphanumeric	YES	See ADC - Notes
Payment Terms	Required	Numeric	YES	Number of terms payable
Payment Amount per Term	Required	Amount (Decimal)	YES	Should be automatically computed based on:
Notes	Optional	Alphanumeric	YES	See ADC - Notes

Note that an item expense may be shared to a more than 1 person
For example, a dish worth Php 500 is shared between Person A and Person B

Supported values - see *Enumerations: Payment Frequency*

▼ Payment Allocation should contain the following:

Name	Mandate	Data Type	Stored in DB	Notes
Description	Required	Alphanumeric	YES	Either
Payee	Required		YES	Person
Amount	Required	Numeric	YES	Amount
Percentage of Total	Required	Numeric	NO	
Status	Required		NO	Support Allocation
Notes	Optional	Alphanumeric	YES	See ADC

Additional Details, Constraints

-None
